Mr. David Henderson, Area Manager
U. S. Bureau of Land Management
Warm Springs Resource Area
P. O. Box 778
Fillmore, Utah 84631

Subject: PLAN OF OPERATION - Pursuant to CFR Title 43
Paragraph 3809.1-3, Notice-disturbance of 5
acres or less

Dear Mr. Henderson:

This letter is to provide notice to the Bureau of Land Management of planned mining operations and includes below the information and statements required in the cited Title 43.

1. The claimant of the property is FELLER HOLDING CORPORATION, whose address is 1051 North 1100 West, St. George, Utah 84770.
The operator of the property is FELLER STONE INC., whose address is 1051 North 1100 West St. George, Utah 84770.
2. The lode claims included in this notice are:
Black Hills No. 2 UMC # 337004,
Black Hills No. 3 UMC # 337005,
Black Hills No. 4 UMC # 337006,
Black Hills No. 5 UMC # 337007
Located around the section corner common to Sections 10, 11, 14 and 15, and in the E $\frac{1}{2}$ W $\frac{1}{2}$ of Section 11, T. 23 S., R. 13 W. SLB&M.
3. Initial mining activity will be conducted near the road in the southern portion of Black Hills No. 3 in the NE $\frac{1}{4}$ NE $\frac{1}{4}$ of Section 15. Mining will be conducted on as needed basis during the summer months.
An estimated production of 500 to 1000 tons per year is scheduled in the years of mining. Mining will be accomplished by drilling and blasting rock in place then loading it onto dump trucks for shipment from the mine. Mining will be conducted along the vein and it is estimated that circa 3 acres will be disturbed at the mine.
Access to the property is from existing roads.

4. Planned reclamation for the disturbed mine area and any new access roads that may be required will be accomplished at the end of the mining operation in circa 25 to 30 years. Reasonable measures will be taken to prevent unnecessary or undue degradation of federal lands during this mining operation.

Access routes are existing roads or trails and they will be maintained to a minimum width needed for the operation and will follow the existing contours where practicable.

It is not anticipated that there will be any tailing dumps or other waste produced by the operation.

Reclamation measures will include saving topsoil for final application on disturbed areas after reshaping. As the mine area is limited mitigating measures to prevent landslides and erosion will be minimal. Present plans do not envision the need for or storage of toxic material on the project. The mine will not disturb any known fisheries and the reclaimed mine will restore any wildlife habitat. Notification will be made to the authorized officer upon completion of mining and the reclamation of the site.

Sincerely,

A handwritten signature in dark ink, appearing to read "Russell C. Feller", is written over a horizontal line.

Russell C. Feller

President, Feller Holding Corporation
